MOHAMED KARAM IBRAHIM

Junior Front-End & Software Developer | Mobile Application Development
01201535709 | mohamedelmagraby35@gmail.com | GitHub: github.com/mohamed249k
Portfolio: my-portfolio-kappa-jade-nfuzhjjfzi.vercel.app | Projects Hub

PROFESSIONAL SUMMARY

Fourth-year Information Technology student (Software Development specialization) with practical freelance and project experience building responsive websites, CRUD web applications, dashboards, and browser tools since 2023. Proficient in HTML5, CSS3, and JavaScript (ES6+), with hands-on skills in DOM manipulation, LocalStorage state persistence, and mobile-friendly UI design. Expanded from front-end web engineering into mobile application development, including publishing a mobile application on Google Play.

TECHNICAL & PROFESSIONAL SKILLS

Web Development: HTML5, CSS3, JavaScript (ES6+), Responsive Design, Flexbox, CSS Grid, DOM Manipulation, Fetch API, LocalStorage, Form Validation, Interactive UI
Software & Databases: Java (Basic), NetBeans GUI Applications, CRUD Development, OOP Fundamentals, SQL Fundamentals, MySQL, Database Design Basics, C++ Essentials
Mobile Development: Mobile Application Development, Mobile UI Usability, Cross-Platform Product Adaptation (Mobile-to-Web), Google Play Store Publishing
Tools & Platforms: VS Code, Git, GitHub, Chrome DevTools, Vercel, Netlify, GitHub Pages, NetBeans, Figma (Basic), Linux Essentials, CCNA Networking Fundamentals
Professional Skills: Problem-Solving, Debugging, Client Communication, Attention to Detail, Time Management, Task Prioritization, Adaptability, Teamwork

PROFESSIONAL EXPERIENCE & IT TRAINING

Freelance Front-End Developer — Independent | 2023 – Present

- Develop and deliver responsive websites, landing pages, and interactive front-end applications for local businesses and personal clients using HTML5, CSS3, and JavaScript (ES6+).
- Build user interfaces, dashboards, CRUD applications, and browser tools featuring search, filtering, sorting, form validation, LocalStorage persistence, and CSV data export.
- Delivered and presented the **Asmak Shaaban** restaurant website (elmohammady.github.io/Shaban-Fish) to the client for deployment; refactored layouts and improved mobile performance.

IT Intern — CIB Summer Training Program — CIB (IT Dept.) | Jul 30 – Aug 15, 2026

- Completed intensive summer training in Commercial International Bank's IT Department, gaining structured exposure to enterprise banking IT environments and technology workflows.

FEATURED TECHNICAL PROJECTS

Mobile App Development & MK-Caf — Mobile Dev, HTML5, CSS3, JS | **MK-Caf App**

- Developed and published a mobile application on Google Play, handling mobile interface design, client-side application logic, and end-to-end store release preparation.
- Evolved the **MK-Caf** café project from mobile application work into a responsive web application (mohamed249k.github.io/MK-Caf-web-application) for cross-device usability.

MK-Hours Time-Tracking App — HTML5, CSS3, JS, LocalStorage | **Live App**

- Built a workday and vacation tracking web app (mohamed249k.github.io/MK-Hours) featuring monthly navigation, dynamic filtering/search, LocalStorage persistence, print views, and CSV export.

Inventory & Product Management System (CRUD) — HTML5, CSS3, JS | 2024

- Developed a full CRUD inventory web application with LocalStorage persistence, search/filter, sorting, CSV export, client-side pagination, validation, and a category valuation dashboard.

Interactive Web Apps & Tools Suite — HTML5, CSS3, JS, Fetch API | **Projects Hub**

- Built and deployed front-end web projects including **ScanMyLinks** (mohamed249k.github.io/ScanMyLinks), **Kemet Digital** (mohamed249k.github.io/Kemet-Digital), **Ma3arf** (mohamed249k.github.io/Ma3arf), and **MK-Portfolio** (mohamed249k.github.io/MK-Portfolio).
- Created modular browser utilities including a Recipe Finder (REST API integration), Photo Edit tool (client-side image filters), Interactive Quiz App, and Portfolio Builder.

Java GUI Lecture System & 3D Printer Docs — Java, NetBeans GUI | 2024 – 2025

- Built a multi-screen Java NetBeans application for managing lecture schedules and courses with add/edit/delete operations, user authentication, role-based views, and local persistence.
- Prepared a 3D Printer Research & Documentation booklet (2025) detailing mechanical, electronic, and firmware components, Bill of Materials (BOM), assembly, and testing procedures.

EDUCATION

B.Tech. in Information Technology (Software Track) — BATU | 2022 – Present

- Fourth-Year Student at Borg El Arab Technological University, Faculty of Industrial & Energy Technology, IT Dept.
- Relevant Coursework: Web Programming I & II, Data Structures, Database Programming, Java, C++ Essentials, Operating Systems, Linux Essentials, CCNA Networking Fundamentals.

CERTIFICATES, TRAINING & LANGUAGES

- **ITIDA Gigs / eYouth Freelancing Training:** Completed training in freelance profile setup, proposal writing, portfolio building, client communication, negotiation, marketing, and financial management; secured first freelance gig via this program.
- **Technical Courses & University Modules:** Front-End Online Courses (HTML, CSS, JavaScript self-study certificates), Git & GitHub Version Control (online training), and BATU institutional modules in CCNA, Linux Essentials, and Web Programming I & II.
- **Languages:** Arabic (Native) | English (Professional working proficiency in reading, writing, and speaking).
